SAMURAI

Future of Work

One founder workspace for company-building work that keeps evidence, decisions, and artifacts connected.

WORKING DRAFT • LOCAL EVIDENCE

Editable PPTX + rendered PDF
Template matching remains pending

THE PROBLEM

Founders need one place to turn an idea into accountable work.

Illustrative founder input

“Build my business: an AI receptionist for Indian dental clinics.”

A founder statement, not market proof.

1

Keep the context

idea, unknowns, next decision

2

Separate evidence

facts, assumptions, measured outcomes

3

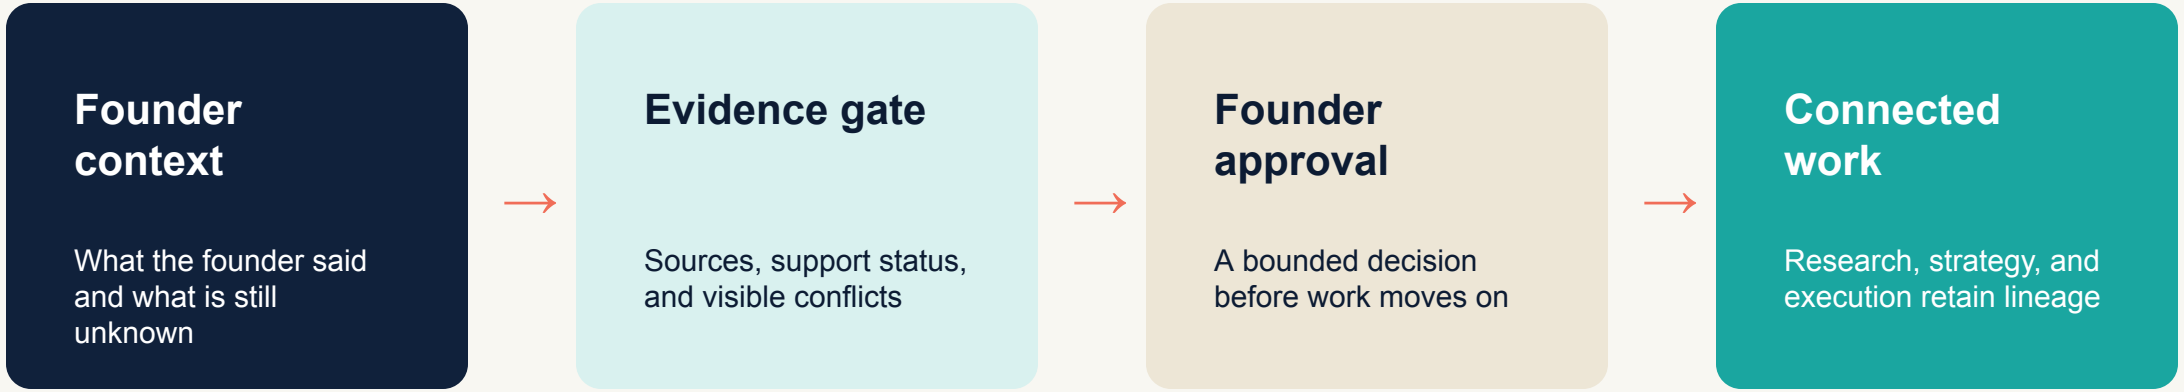

Ask for approval

before consequential work advances

The local draft shows a product direction, not a claim of customer validation, demand, pricing, revenue, or traction.

THE PRODUCT

Samurai organizes one workflow around a founder's decisions.

The diagram is editable and describes intended workflow behavior. It does not represent a new captured user session.

GENAI IMPLEMENTATION

Gemini is part of the reasoning design; evidence status depends on the exact environment.

Historical deployed evidence

A prior Cloud Run/IAP acceptance recorded a bounded Gemini-backed brief and reload at its recorded revision.

Historical evidence only. It does not say this local draft is deployed.

Current local evidence

Provider-free acceptance covers recovery, UI terminal states, and readiness boundaries without a new provider call.

Current cloud queue, current Gemini use, and paid upgrade remain deferred.

RELIABILITY OF THE WORKFLOW

The verifier keeps unsupported claims visible instead of decorating a pitch.

Founder statement

“Clinics need this service.”

Recorded as input, not promoted to fact.

Verifier

Support missing

The claim stays unresolved until sources actually support it.

Founder decision

Collect source support before strategy.

The next step stays bounded and reviewable.

WHAT HAS BEEN VERIFIED LOCALLY

Local acceptance gives the draft a reliability baseline, with clear limits.

Durable recovery

201f0f7
formatted aa07b46

Native queue recovery and cancellation passed locally.

Founder UI

1a4c6a9

Terminal cancellation and exhaustion states passed locally.

Readiness runner

76c9884

Provider-free boundary journey passed locally.

Local onboarding

1f841e7

Provider-free setup/CI wiring was locally accepted.

Founder schema c4a6e70 is locally accepted. Shared-workspaces runtime, current cloud recovery, live second-account isolation, and paid upgrade are not complete.

WORKING DRAFT • LOCAL EVIDENCE

This draft has a useful role. It is not Task 14 complete.

1	**Portal and template**	Confirm the actual template, category choice, team status, and fields through an authorized account.
2	**Candidate evidence**	Bind current cloud, Gemini, recovery, and source-support evidence to the exact submission revision.
3	**Public package**	Create and review the video, public links, evaluator access arrangement, and final submission receipt.

Local outputs today: editable PPTX, rendered PDF, slide previews, speaker-note evidence map, and review receipt.
